ACKNOWLEDGMENTS

I sincerely thank my thesis advisor Dr. Nicholas Welschmeyer and committee members Dr. Grieg Steward and Dr. Mike Foster for their acceptance, support and critical review of this thesis. I thank the members of the Biological Laboratory at MLML for their work during data collection, and in particular, to Jimmy Smith for his poignant insights and commentary. Dr. Dick Zimmerman and Dr. Jason Smith generously donated their time and laboratory. I thank the staff of CSU Hayward's MAGIC microscopy laboratory for access to their Transmission Electron Microscope. This research was funded by The National Science Foundation, The Earl and Ethyl Myers Oceanographic Trust Fund and The David and Lucille Packard Foundation for Marine Research.
